

36/7/4 Attachment Pattern

THE SOLUTION TO YOUR ATTACHMENT NEEDS FOR DGB-36 ROOF DECK

Established in 2009, the **36/7/4 Attachment Pattern** reduces attachments to supports by as much as 30%, significantly lowering installation costs.

36/7/4 Attachment Pattern requires fewer diaphragm shear zones for optimized design.

- Results in simpler design
- Reduces potential construction errors
- Contributes to easier inspections

36/7/4 eliminates the outdated **36/5** attachment pattern, reducing the need for multiple design and construction choices

Tables presented with both ASD and LRFD values
